ZACCARIA

**Outstanding
quality and
presentation.**

The Zaccaria Company is located in Calderara di Reno, a Province of Bologna in Italy. The manufacturing and production facilities occupy a space of 9000 square metres and specialize in the ma-

nufacture of pinball and video games. The capacity of the company is very diverse and ranges from the design and production right through to after sales assistance and technical back up.

MANAGEMENT STAFF

MARINO ZACCARIA,
business management

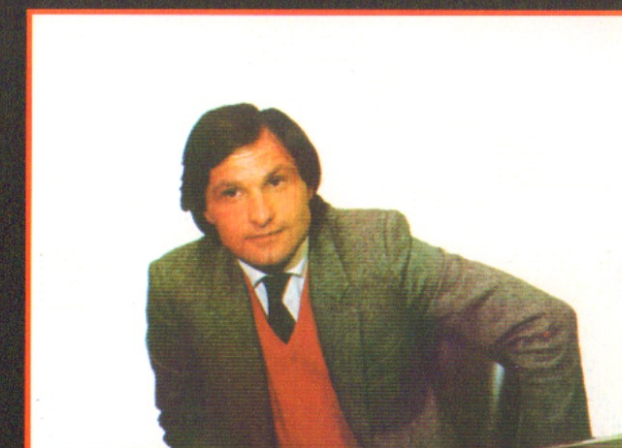

The management of the Company is undertaken by the three Zaccaria brothers, assisted by a team of professionals many of whom operate outside Italy.

FRANCO ZACCARIA,
production management

NATALE ZACCARIA,
project engineering and design
management

GIANNI PULEGA,
financial manager

ANNIBALE TADDEI,
Italian area manager

SECRETARIAL STAFF

The management of the Company is undertaken by the three Zaccaria brothers, assisted by a team of professionals many of whom operate outside Italy.

The final products are the result of a long chain of professional and competent people. Among these are the purchase department and accounting division personnell.

The management secretariat and the export sales management personnell are a valuable part of the Company's strategy.

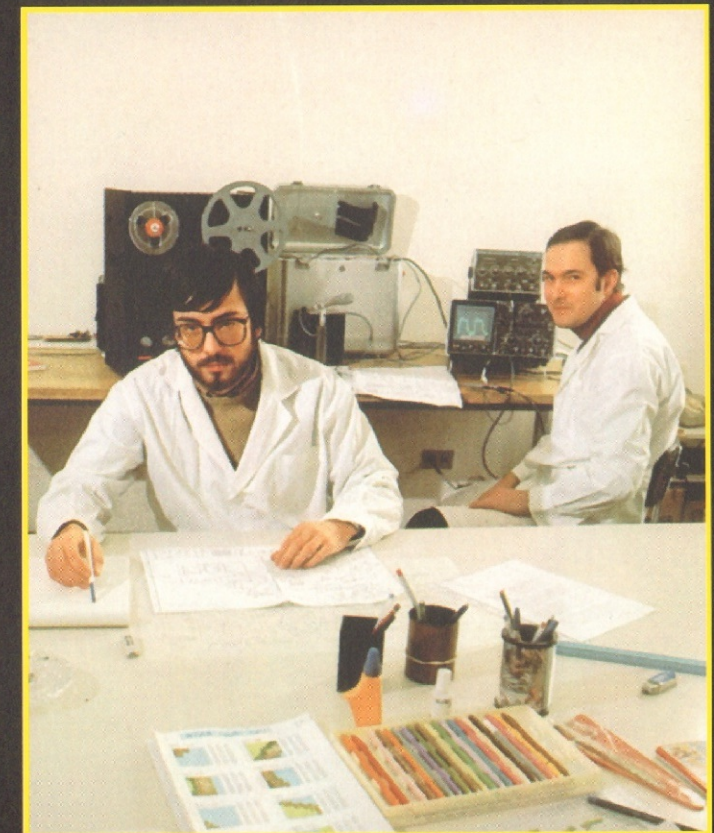

THE DESIGN ENGINEERS

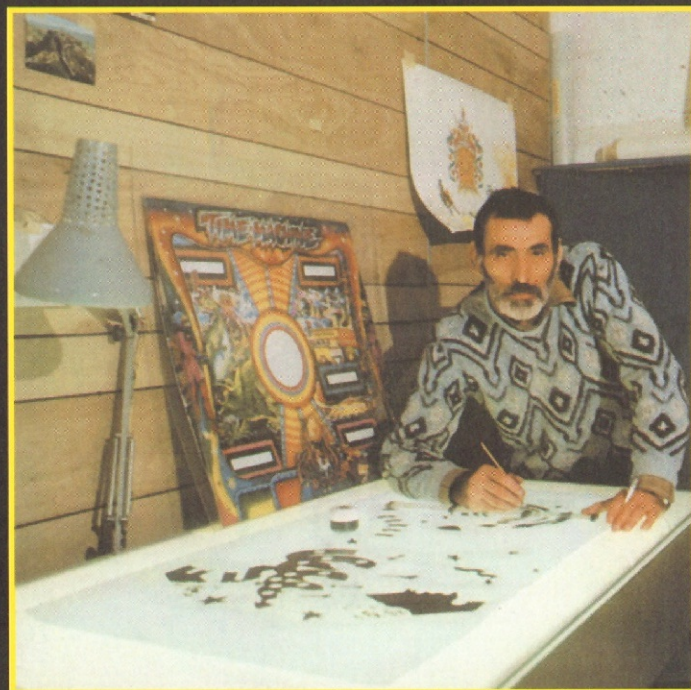

The technical design staff supply the basic concept to the mechanical design engineers, who in turn are supported by the electronic engineers responsible for electronic hardware, and software design.

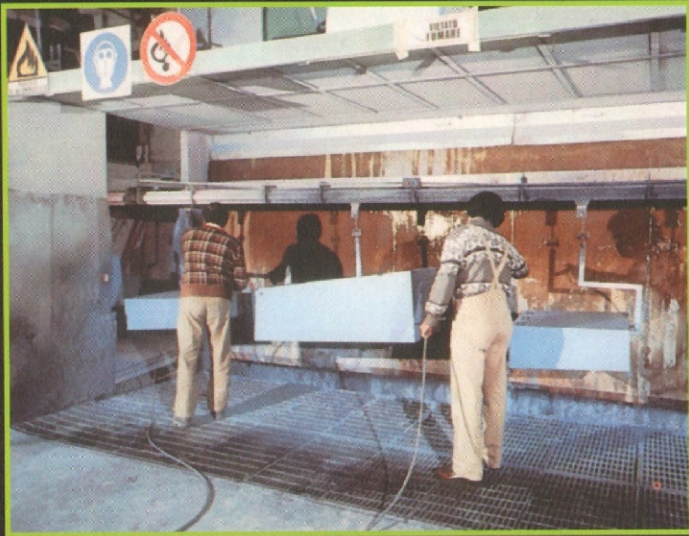

Other departments prepare instruction manuals, and drawings, which explain in great detail the technicalities of the products. Artistically inclined staff and graphic designers ensure top quality presentation of the various models.

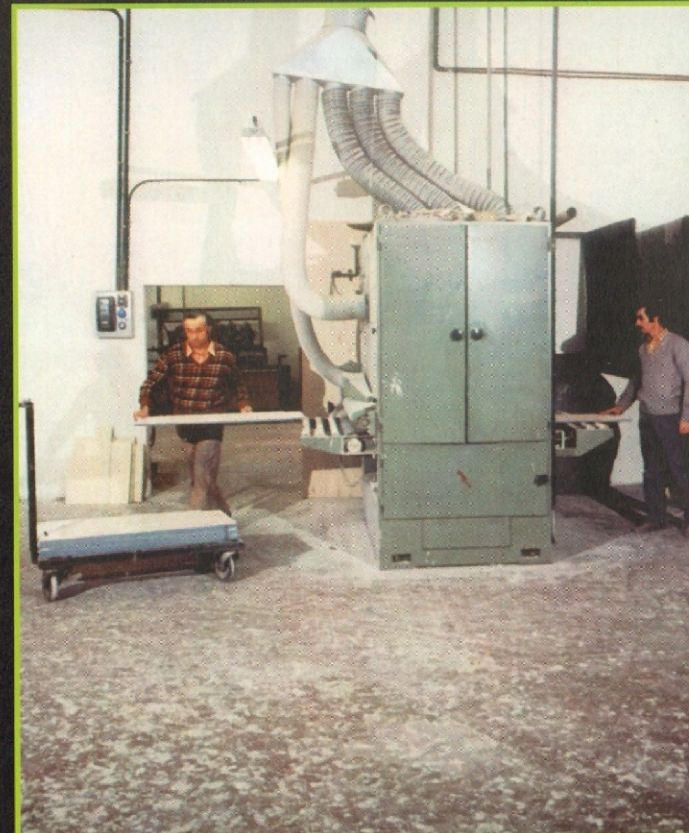

The whole concept is a combination of colourful graphics and sound formulated by the designers who characterize the many aspects of the Company's life.

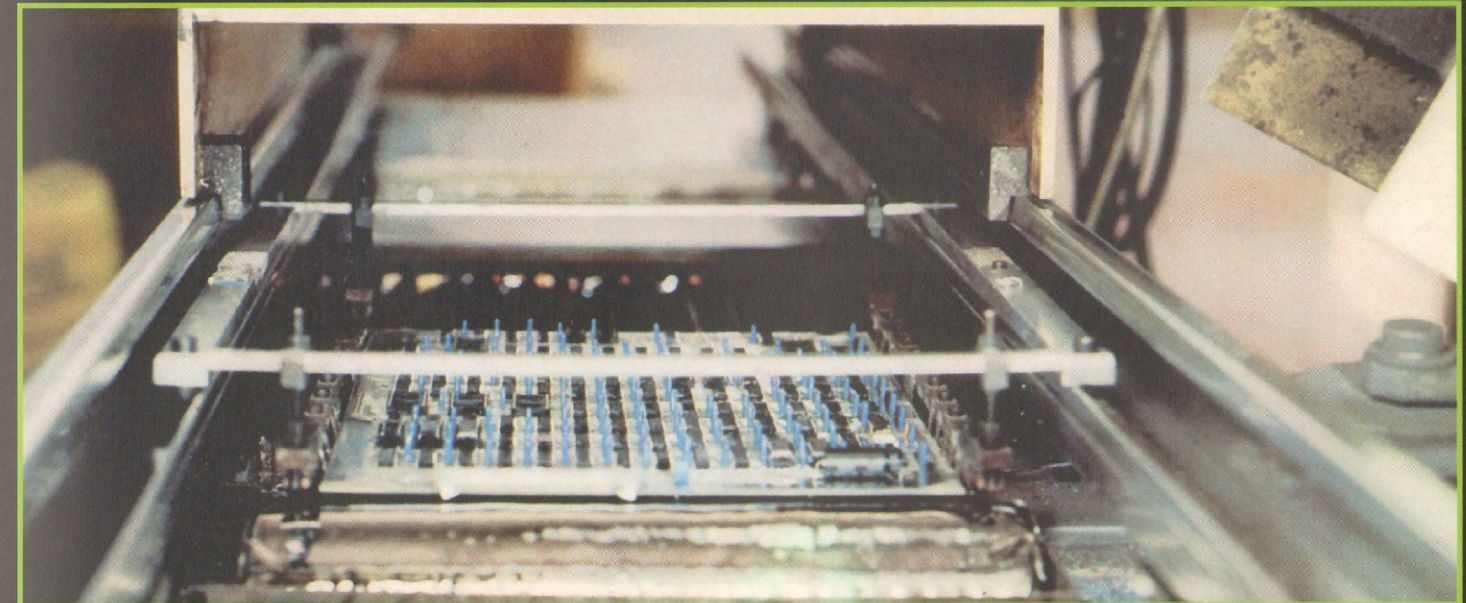

THE MANUFACTURING DEPARTMENTS

Manufacturing covers a wide range of activities ranging from woodworking and paint shops to metal fabrication, and the assembly and test of printed circuit boards and electronic assemblies.

Production line method are employed using modern plant and machinery located in a pleasant environment.

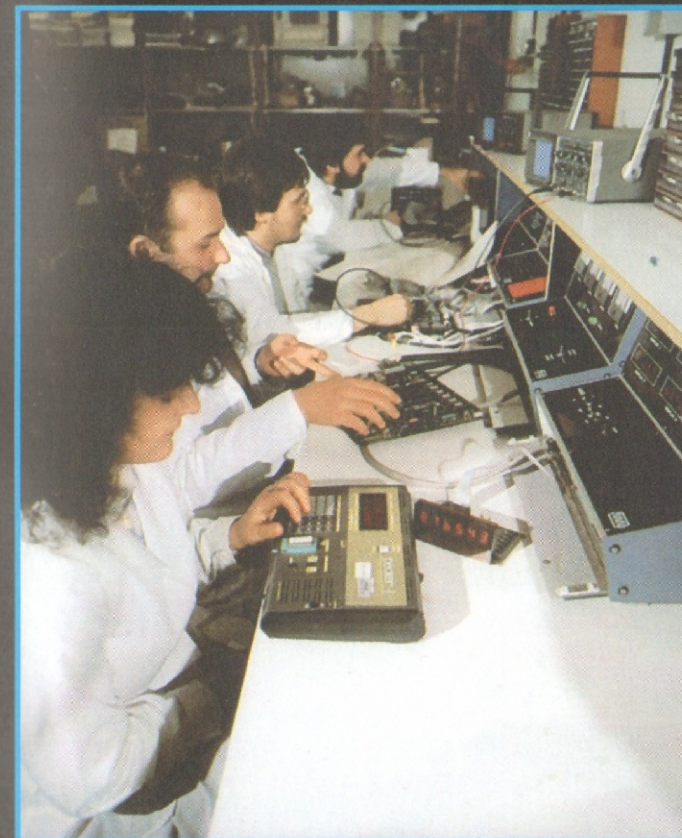

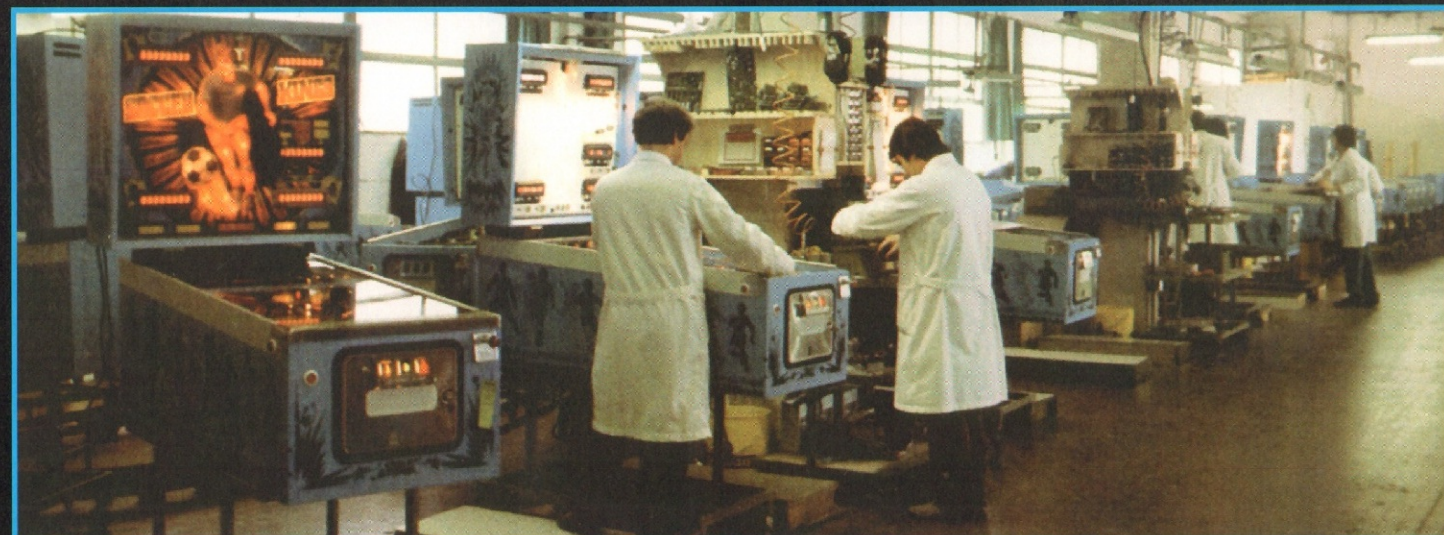

THE FINISHED PRODUCT AND AFTER SALES ASSISTANCE

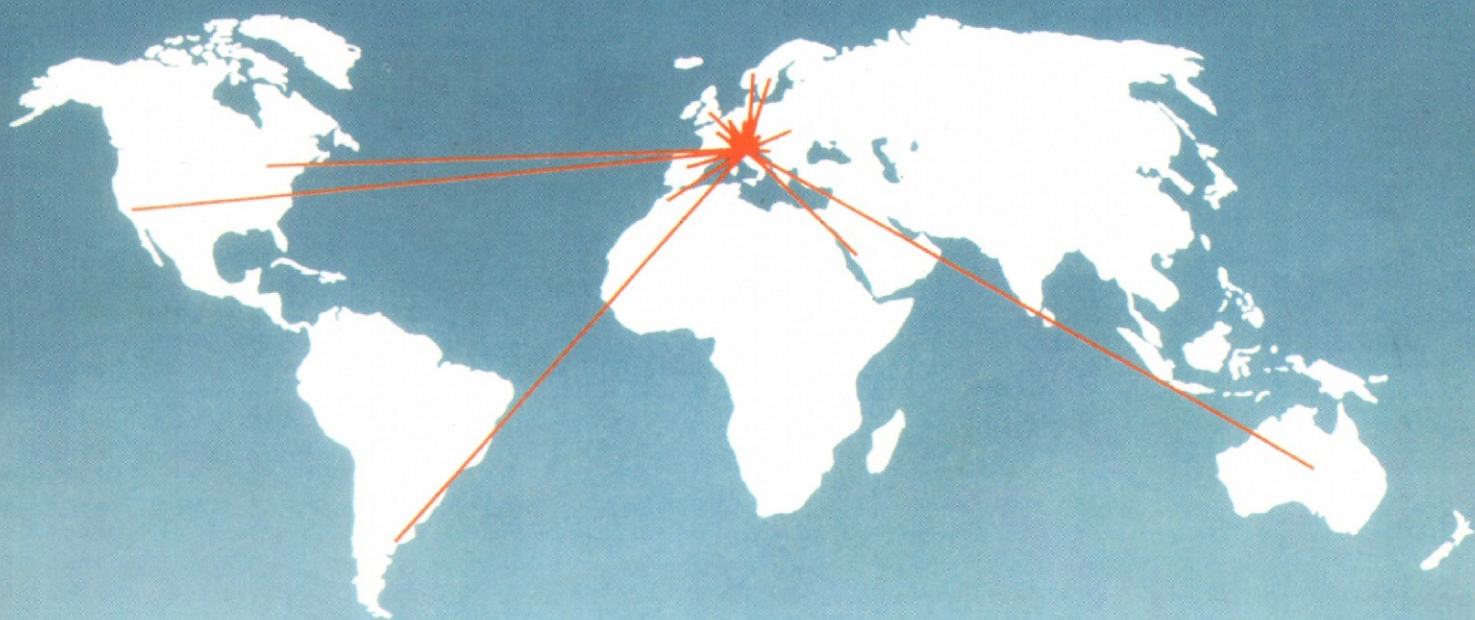

The final assembly lines are the focal point of the whole facility. The spare part and service back up provide a guarantee to the eventual purchaser that his investment in a Zaccaria product has been a sound one.

The production stages draw to a conclusion in the main assembly plant. Here the efficiency of the company keeps it in line and often ahead of its competitors throughout the world. As a result of devoted teamwork in the design stages pre-production, manufacture, and after sales service the purchaser is sure of a first class product.
